

Angular Libs testing with Jest

Warsaw, 16.10.2018

Tomasz Scislo

Agenda

1. Jest with Angular 6 Libs

- Jest does not use a browser to launch the test - it is fast!
- it is possible to launch Jest tests separately for each app/lib in Angular Cli

2. Jest in watch mode

- by default Jest launches only tests that has been changed

3. Skipping tests

4. Snapshot testing

5. Spies

- Jasmine Spies work fine with Jest. Jest understands Jasmine by default.

6. Gotchas with Jest
